

MUTALIB ADEBAYO

Senior Frontend Developer

+2347082131382 • adebayomutalib5@gmail.com

Professional Summary

Detail-oriented Senior Frontend Engineer with over 6.5 years of experience architecting high-performance, scalable enterprise SaaS and admin platforms using React, Next.js, and modern Angular. Proven track record of leveraging advanced state management (Redux, Context API, RxJS, Signals) and component-driven architecture to translate complex enterprise business logic into intuitive, accessible user interfaces with robust role-based access controls. Possesses a strong full-stack foundation, enabling independent backend API debugging, seamless collaboration with .NET/Node teams, and true end-to-end feature ownership.

Technical Skills

- Frontend Architecture: React.js, Next.js, Angular, TypeScript, State Management, Framer Motion, UI/UX Optimization
- Backend & Systems: Node.js, TypeScript, Express.js, Microservices, RESTful APIs, Event-Driven Architecture
- Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD Pipelines, Git Workflows
- Databases: PostgreSQL, MySQL, NoSQL, Redis

Professional Experience

Senior Frontend Engineer | SmartTerm Limited 03/2024 - Present | Kingston, Jamaica (Remote)

- Lead the architectural design and development of highly responsive, multi-tenant SaaS client-side desktop and web applications using modern React and Nextjs.
- Establish strictly typed data contracts between the frontend clients and backend microservices, entirely eliminating network-layer integration bugs.
- Drive end-to-end feature delivery by automating cloud deployment pipelines (AWS/CI/CD) and optimizing Node.js REST APIs to ensure blazing-fast frontend data consumption.

Frontend Engineer | Fidelity Bank 06/2025 – 12/2025 | Lagos, Nigeria

- Spearheaded the architectural revamp of the new retail online banking platform, utilizing modern Angular with Standalone Components to transform complex banking workflows into an intuitive, low-latency customer journey.
- Maintained and optimized the legacy digital banking portal (React), proactively monitoring system stability and resolving customer-impacting UI bugs to ensure uninterrupted financial services.
- Engineered supplementary digital platforms and internal web applications utilizing React.js, collaborating tightly with Product Managers and UX designers in rapid Agile sprint cycles.
- Supported User Acceptance Testing (UAT) and strict pre-deployment validations to guarantee functional accuracy, enterprise security permission checks, and performance readiness across all digital channels.

Frontend Engineer (Contract) | Mirton Matador Group 01/2025 – 06/2025 | Lagos, Nigeria

- Architected and delivered **Edu_Pay**, a comprehensive full-stack educational platform utilizing React and Vite, delivering a highly responsive SPA with secure multi-role transaction management and JWT authentication.
- Developed **TandTDealsStore**, a production-ready e-commerce web application featuring seamless cart management, product catalog interfaces, and third-party email/payment integrations.

Frontend Engineer | Zenith Bank 09/2022 – 09/2024 | Lagos, Nigeria

- Architected and overhauled the frontend infrastructure for internal trade finance portals, drastically reducing initial load times and optimizing DOM rendering performance using React and Angular.
- Developed and maintained highly reusable, modular UI component libraries, accelerating enterprise feature delivery and ensuring strict design system consistency across banking platforms.
- Engineered robust client-side state management and error handling to securely consume complex RESTful APIs, ensuring the seamless processing of massive financial payloads for over 500 daily internal operators.
- Collaborated tightly with UX/UI and backend engineering teams to resolve critical frontend bottlenecks, ensuring a flawless browsing experience with zero downtime.

Frontend Developer | REKORD INNOVATIVE TECHNOLOGIES LTD 01/2020 – 01/2022 | Lagos, Nigeria

- Architected and engineered the frontend for a large-scale e-commerce web application, developing modular Angular component libraries for product catalogs, real-time cart management, and seamless payment gateway integrations.
- Delivered a highly responsive SPA for a private educational client, implementing secure multi-role transaction management, state handling, and strict JWT authentication protocols.
- Maintained and optimized legacy UI codebases over a two-year lifecycle, implementing automated component testing and resolving cross-browser compatibility issues to consistently improve initial page load times and Core Web Vitals.

Education

Bachelor's Degree: Agricultural and Biosystem Engineering 04/2018 | University of Ilorin - Ilorin, KW
