

MUTALIB ADEBAYO

Full Stack Software Developer

+2347082131382 • adebayomutalib5@gmail.com

Professional Summary

Detail-oriented Full-Stack Engineer with deep expertise in building high-performance, client-side applications (React, Angular) and architecting scalable backend systems (Node.js, TypeScript). Proven track record of owning the entire software lifecycle—from designing intuitive UI component libraries to implementing decoupled Microservices and deploying automated CI/CD pipelines on AWS. Passionate about bridging the gap between flawless user experiences and robust, event-driven cloud infrastructure.

Technical Skills

- Frontend Architecture: React.js, Next.js, Angular, Electron, HTML, CSS, State Management, Bootstrap, UI/UX Optimization
- Backend & Systems: Node.js, TypeScript, Express.js, Microservices, RESTful APIs, Event-Driven Architecture
- Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD Pipelines, Git Workflows
- Databases: PostgreSQL, MySQL, NoSQL, Redis

Professional Experience

Software Developer | SmartTerm Limited 03/2024 - Present | Kingston, Jamaica (Remote)

- Lead the architectural design and development of highly responsive, multi-tenant SaaS client-side desktop and web applications using modern Angular and React.
- Established strictly typed data contracts between the frontend clients and backend microservices entirely eliminating network-layer integration bugs.
- Drive end-to-end feature delivery by automating cloud deployment pipelines (AWS/CI/CD) and optimizing Node.js REST APIs to ensure blazing-fast frontend data consumption.

Software Developer (contract) | Fidelity Bank 06/2025 – 12/2025 | Lagos, Nigeria

- Spearheaded the architectural revamp of the new retail online banking platform, utilizing modern Angular with Standalone Components to transform complex banking workflows into an intuitive, low-latency customer journey.
- Maintained and optimized the legacy digital banking portal (AngularJS), proactively monitoring system stability and resolving customer-impacting UI bugs to ensure uninterrupted financial services.
- Engineered supplementary digital platforms and internal web applications utilizing **React.js**. Also collaborating tightly with Product Managers and UX designers in rapid Agile sprint cycles.
- Supported User Acceptance Testing (UAT) and strict pre-deployment validations to guarantee functional accuracy, enterprise security permission checks, and performance readiness across all digital channels.

Software Developer (Contract) | Mirton Matador Group 01/2025 – 06/2025/ *Lagos, Nigeria*

- Architected and delivered Edu_Pay, a comprehensive full-stack educational platform utilizing Angular, delivering a highly responsive SPA with secure multi-role transaction management and JWT authentication.
- Developed TandTDealsStore using React, a production-ready e-commerce web application featuring seamless cart management, product catalog interfaces, and third-party email/payment integrations.

Software Developer | Zenith Bank 09/2022 – 09/2024 / *Lagos, Nigeria*

- Architected and overhauled the frontend infrastructure for internal trade finance portals, drastically reducing initial load times and optimizing DOM rendering performance using Angular and React.
- Developed and maintained highly reusable, modular UI component libraries, accelerating enterprise feature delivery and ensuring strict design system consistency across banking platforms.
- Engineered robust client-side state management and error handling to securely consume complex RESTful APIs, ensuring the seamless processing of massive financial payloads for over 500 daily internal operators.
- Collaborated tightly with UX/UI and backend engineering teams to resolve critical frontend bottlenecks, ensuring a flawless browsing experience with zero downtime.

Software Developer | REKORD INNOVATIVE TECHNOLOGIES LTD 01/2020 – 01/2022 / *Lagos, Nigeria*

- Led the backend development lifecycle for multiple client applications, architecting robust Node.js RESTful APIs and designing optimized relational and non-relational database schemas from initial spec to deployment.
- Delivered a highly responsive SPA using React for a private educational client, implementing secure multi-role transaction management, state handling, and strict JWT authentication protocols.
- Maintained and optimized legacy UI codebases over a two-year lifecycle, implementing automated component testing and resolving cross-browser compatibility issues to consistently improve initial page load times and Core Web Vitals.

Education

Bachelor's Degree: Agricultural and Biosystem Engineering 04/2018 / *University of Ilorin - Ilorin, KW*
